Public Sandbox Roundtable

23.01.2024

**Collaborate
and
learn from each other**

Agenda

Next steps

Update FOITT Public Sandbox

Tech decision

Q & A

Next steps

Update FOITT

Numbers

- 28 applications and onboardings (+3)
- 77 schemas registered (+15)

Facts

- Nothing special, always open for new applications and onboardings.

The Hyperledger Indy Sandbox will be kept alive until end of 2024.

Tech Decision for E-ID

Thank all for answering the poll.

Now we will analyse the results and communicate as soon as we have a decision.

Q&A Session #1

Question: Will there be a Sandbox 2.0 release with final techstack?

Answer: We plan to have a Sandbox 2.0 (name tbd) in Q1 2025.

Q: How to address trust layer. How about timeline? How to implement the existing registries (like Grundbuch).

A: In the law there is mentioned a trust-registry. The exact implementation is in discussion also the technical implementation. The trust-registry will be provided by the government.

Timeline: Start to have a deeper dive after the techdecision.

Q: How to sync private sector and gov-service for Trust-registries?

A: The trust-registry from the government does not have to be the only trust registry. It is possible, that a private actor can publish a trust registry and the user has to decide on which trust registry he will trust.

Q&A Session #2

Q: How is the eLFA System implemented?

A: We implement the techstack which is mentioned by the EU-ARF. Base-Registry is DID-JWT based.

The code (base registry and wallet) will be opensource (via github) after go-live.

Q: Which credential type is the eLFA issued?

A: We will have a SD-JWT in the eLFA pilot (like the EU-ARF).

Information from participants

Feel free to share:

- **Requests for Collaboration & Ideas**
- **Your current Status**
- **Issues & Wishes for the future**

Please raise your MS-Teams virtual hand if you wish to speak.

Next Steps

- Participation Meeting February is cancelled.
- Next roundtable Meeting in April.
